

MAD PWA LAB 1

NAME: Prajakta Upadhye

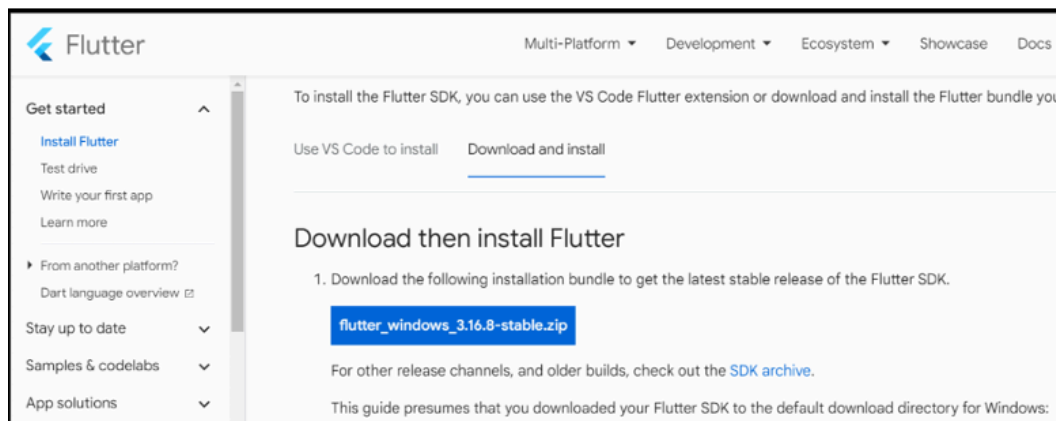

Batch : C

Class : D15A

Roll No. : 65

Aim: To install flutter and Android Studio and create a 'Hello World App' using Flutter

Step 1: Download the installation bundle of the Flutter Software Development Kit for windows. To download Flutter SDK, Go to its official [website](https://docs.flutter.dev/get-started/install) <https://docs.flutter.dev/get-started/install>, you will get the following screen.

Step 2: Next, to download the latest Flutter SDK, click on the Windows **icon**. Here, you will find the download link for [SDK](#).

Step 3: When your download is complete, extract the **zip** file and place it in the desired installation folder or location, for example, C: /Flutter.

Step 4: To run the Flutter command in regular windows console, you need to update the system path to include the flutter bin directory. The following steps are required to do this:

Step 4.1: Go to MyComputer properties -> advanced tab -> environment variables. You will get the following screen.

Step 4.3: In the above window, click on New->write path of Flutter bin folder in variable value - > ok -> ok -> ok.

Step 5: Now, run the \$ **flutter** command in command prompt.

```
C:\Users\acer>flutter --version
```

```
A new version of Flutter is available!
```

```
To update to the latest version, run "flutter upgrade".
```

```
Flutter 3.16.7 • channel stable • https://github.com/flutter/flutter.git  
Framework • revision eflaf02aea (8 days ago) • 2024-01-11 15:19:26 -0600  
Engine • revision 4a585b7929  
Tools • Dart 3.2.4 • DevTools 2.28.5
```

```
C:\Users\acer>flutter devices
```

```
Found 3 connected devices:
```

```
Windows (desktop) • windows • windows-x64 • Microsoft Windows [Version 10.0.22621.3007]  
Chrome (web) • chrome • web-javascript • Google Chrome 120.0.6099.225  
Edge (web) • edge • web-javascript • Microsoft Edge 120.0.2210.121
```

```
Run "flutter emulators" to list and start any available device emulators.
```

```
If you expected another device to be detected, please run "flutter doctor" to diagnose potential issues. You can also try increasing the time to wait for connected devices with the "--device-timeout" flag. Visit https://flutter.dev/docs/development/tools-and-devices/troubleshooting for troubleshooting tips.
```

Now, run the \$ **flutter doctor** command. This command checks for all the requirements of Flutter app development and displays a report of the status of your Flutter installation.

Step 6: When you run the above command, it will analyze the system and show its report, as shown in the below image. Here, you will find the details of all missing tools, which are required to run Flutter as well as the development tools that are available but not connected with the device.

Step 7: Install the Android SDK. If the flutter doctor command does not find the Android SDK tool in your system, then you need first to install the Android Studio IDE. To install Android Studio IDE, do the following steps.

Step 7.1: Download the latest Android Studio executable or zip file from the [official site](#).

Step 7.2: When the download is complete, open the **.exe** file and run it. You will get the following dialog box.

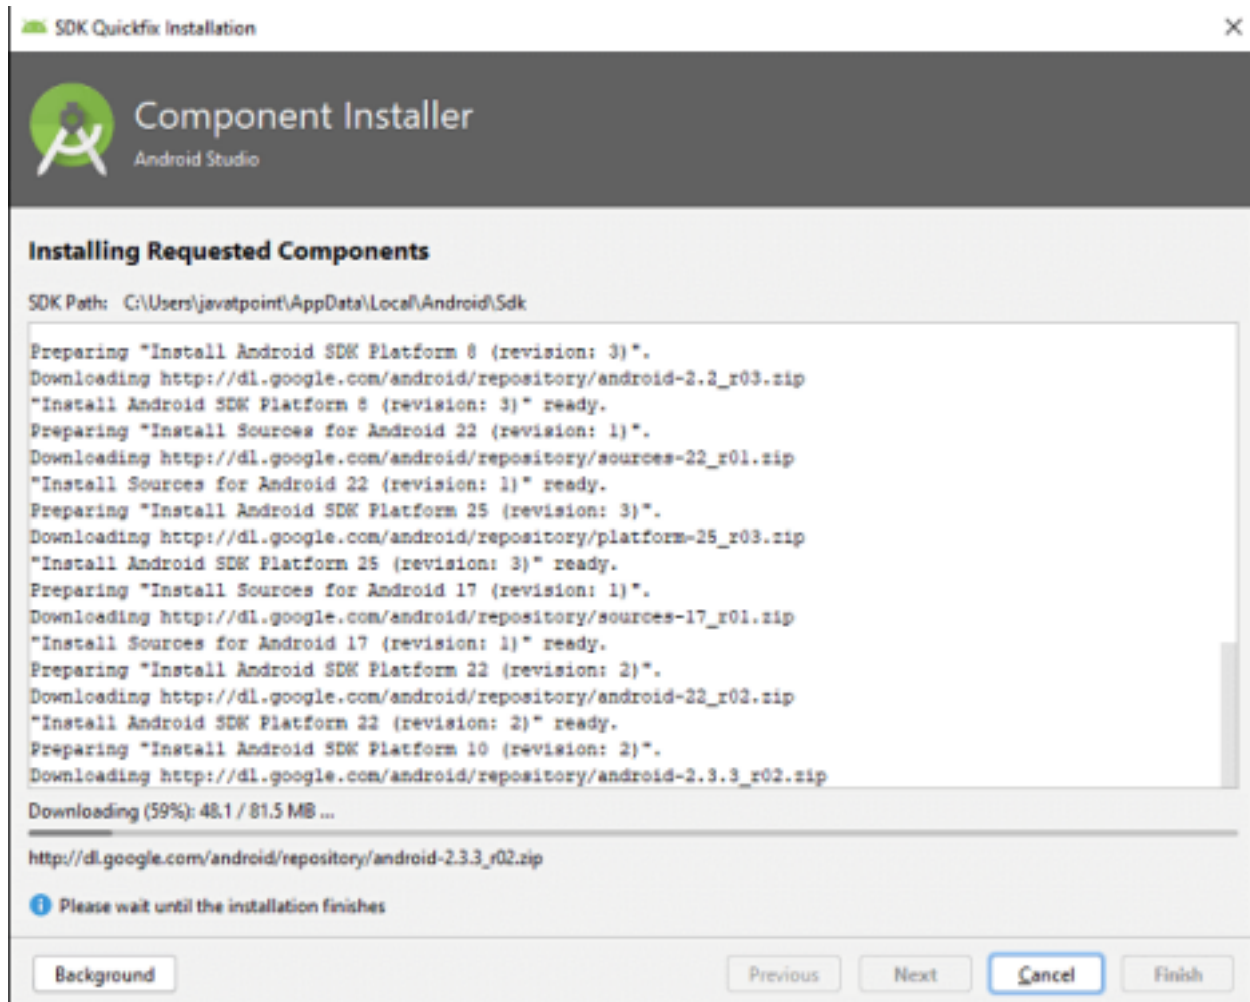

Step 7.3: Follow the steps of the installation wizard. Once the installation wizard completes, you will get the following screen.

Step 7.4: In the above screen, click Next-> Finish. Once the Finish button is clicked,

you need to choose the 'Don't import Settings option' and click OK. It will start the Android Studio.

Step 7.5 run the \$ **flutter doctor** command and Run flutter doctor --android-licenses command.

```
Command Prompt

18.7 Special Terms for Pre-Release Materials. If so indicated in the description of the Evaluation Software, the Evaluation Software may contain Pre-Release Materials. Recipient hereby understands, acknowledges and agrees that: (i) Pre-Release Materials may not be fully tested and may contain bugs or errors; (ii) Pre-Release materials are not suitable for commercial release in their current state; (iii) Regulatory approvals for Pre-Release Materials (such as UL or FCC) have not been obtained, and Pre-Release Materials may therefore not be certified for use in certain countries or environments or may not be suitable for certain applications and (iv) MIPS can provide no assurance that it will ever produce or make generally available a production version of the Pre-Release Materials. MIPS is not under any obligation to develop and/or release or offer for sale or license a final product based upon the Pre-Release Materials and may unilaterally elect to abandon the Pre-Release Materials or any such development platform at any time and without any obligation or liability whatsoever to Recipient or any other person.

ANY PRE-RELEASE MATERIALS ARE NON-QUALIFIED AND, AS SUCH, ARE PROVIDED AS IS AND AS AVAILABLE, POSSIBLY WITH FLAWS, AND WITHOUT REPRESENTATION OR WARRANTY OF ANY KIND.

18.8 Open Source Software. In the event Open Source software is included with Evaluation Software, such Open Source software is licensed pursuant to the applicable Open Source software license agreement identified in the Open Source software comments in the applicable source code file(s) and/or file header as indicated in the Evaluation Software. Additional detail may be available (where applicable) in the accompanying on-line documentation. With respect to the Open Source software, nothing in this agreement limits any rights under, or grants rights that supersede, the terms of any applicable Open Source software license agreement.

-----
Accept? (y/N): y
All SDK package licenses accepted

C:\Users\jaipal\flutter doctor
Doctor summary (to see all details, run flutter doctor -v):
[✓] Flutter (Channel stable, 2.6.1, on Microsoft Windows [Version 10.0.22042.1415], locale en-US)
[✓] Android toolchain - develop for Android devices (Android SDK version 33.0.0)
[✓] Chrome - develop for the web
[✓] Android Studio (version 2020.3)
[✓] VS Code (version 1.55.2)
[✓] Connected device (2 available)

! No issues found!

C:\Users\jaipal\flutter doctor_
```

Step 8: Next, you need to set up an Android emulator. It is responsible for running and testing the Flutter application.

Step 8.1: To set an Android emulator, go to Android Studio > Tools > Android > AVD Manager and select Create Virtual Device. Or, go to Help->Find Action->Type Emulator in the search box. You will get the following screen.

Step 8.2: Choose your device definition and click on Next.

Step 8.3: Select the system image for the latest Android version and click on Next.

Step 8.4: Now, verify the all AVD configuration. If it is correct, click on Finish. The following screen appears.

Step 8.5: Last, click on the icon pointed into the red color rectangle. The Android emulator displayed as below screen.

Step 9: Now, install Flutter and Dart plugin for building Flutter application in Android Studio. These plugins provide a template to create a Flutter application, give an option to run and debug Flutter application in the Android Studio itself. Do the following steps to install these plugins.

Step 9.1: Open the Android Studio and then go to File->Settings->Plugins.

Step 9.2: Now, search the Flutter plugin. If found, select Flutter plugin and click install. When you click on install, it will ask you to install Dart plugin as below screen. Click yes to proceed.

Step 9.3: Restart the Android Studio.

CODE:

```
import 'package:flutter/material.dart';
void main() {
  runApp(const MyApp());
}
class MyApp extends StatelessWidget {
  const MyApp({Key? key}) : super(key: key);
  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      title: 'Welcome to Flutter',
      home: Scaffold(
        appBar: AppBar(
          title: const Text('Welcome Prajakta Upadhye'),
        ),
        body: const Center(
          child: Text('Hello World'),
        ),
      ),
    );
  }
}
```

Conclusion: Thus, we installed flutter and android studio and created our first flutter application.
